

HUSHCORE™ *BARRICADE™* SYSTEM

Supply drop with *BARRICADE™* System external acoustic lagging

- *Reduces supply and return duct breakout and radiated noise*
 - *Composite exterior acoustic insulation using quilted fiberglass and loaded vinyl flexible barriers*
- HUSH WRAP™ dual density construction model LVQ-210-LAG
 - Tested for Insertion Loss per ASTM E-1222 “Standard Test Method for Laboratory Measurement of the Insertion Loss of Pipe Lagging Systems”
 - Installs with banding, adhesives and/or mechanical insulation clip fasteners
 - Seams and overlaps sealed with matching FSK tape.
